

TUBEX VIÑA

Twin-wall vine shelter that provides a greenhouse effect, specially designed for use in vine plantations.

Its features are similar to those of the TUBEX Ecovine; with the added advantage of being **STURDIER AND LONGER-LASTING** as a result of having a heavy-duty construction:

It allows the use of in-row weeders/cultivators, which could cause damage to less sturdy shelters, resulting in **significant savings in terms of herbicide costs.**

It is suitable for use on very stony ground and is easy to install thanks to its sturdy construction.

It is very solid so acts as a stake to train vine growth.

It is longer lasting so degrades more slowly.

Specially designed diameters for better plant growth and development.

SPECIFICATIONS

Polypropylene with UV stabiliser

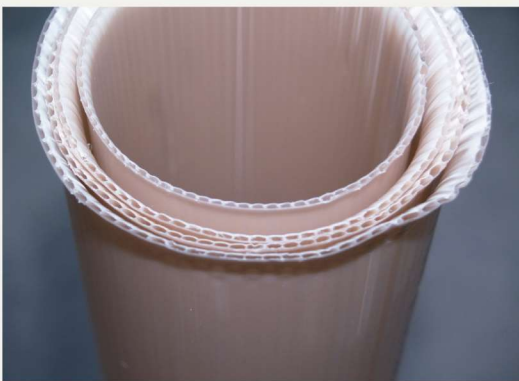

Height: 40 cm, 50 cm, 55 cm, 60 cm and 75 cm

Diameter: 7,1 cm - 8,6 cm (nests of 4)

Colour: pink or green

Anti-abrasion flared top rim

Solid

Flared top rim to prevent abrasion to the plant stem

TUBEX VIÑA (Colour pink)

Height [cm]	Packaging	Ref.
