

TUBEX GRAN DIÁMETRO

Tubex Large Diameter is a shelter specially designed to protect shrubs used for landscaping and garden restoration projects.

It is a strong, large-diameter shelter that is ideal for bushy plants. See diameters available under "Specifications"

Excellent protection from herbicides and rodents.

Thanks to its solid, twin-wall construction, it promotes and increases plant growth, creating better coverage in less time.

Quick and easy to install. Fitted with ties to allow attachment to a stake.

It can perform a "watering" function to allow irrigation for plant establishment.

Using pine bark mulch outside and/or inside the shelter can provide effective and aesthetic protection from weeds.
